

# Let The Game Begin!!!

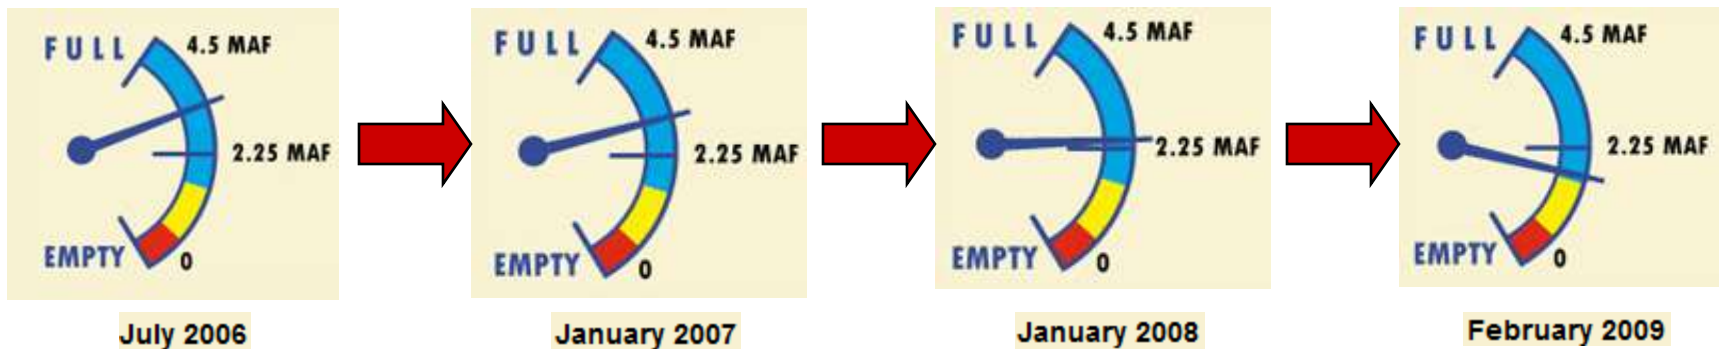

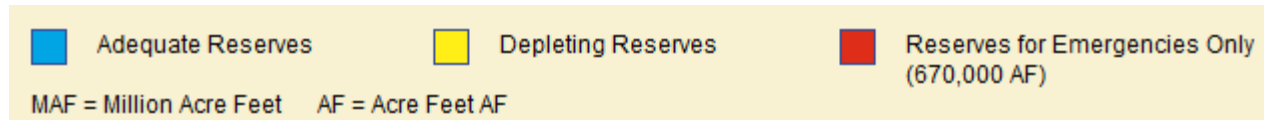

**UNIVERSITY OF SOUTHERN CALIFORNIA  
DEPARTMENT OF CIVIL AND ENVIRONMENTAL ENGINEERING**

Directing Faculty: Dr. Vincent W. Lee  
Student Manager: Chanin Chaun-Im

[http://www.usc.edu/dept/civil\\_eng/dept/](http://www.usc.edu/dept/civil_eng/dept/) Phone: (213) 740-2032 Fax: (213) 740-8399

# Why Use a Water Game for Water Conservation Education?

- Water conservation is necessary due to drought and regulatory water issues. ([www.bewaterwise.com](http://www.bewaterwise.com))

1 Acre-Foot of water is the amount of water for 2 families of 4 use in one year

# Why Use a Water Game for Water Conservation Education?

- Many people are unaware of the current situation with potable water in Southern California.
- Education is the key to help people learn and understand how the water system works.
- **Games** are one of the best ways to help people gain knowledge in a fun and interactive environment.

# Game Development

- Determining the game strategy and focus is very important.
- The game must balance knowledge and fun.
- The game should show the complexity of the water supply system in a way that is easy to understand.
- Game rules should be simple and easy to understand.

# What Kind Of Knowledge Will The Game Provide?

- Water sources
- Water treatment
- Water rights
- Water distribution systems
- Water reclamation
- Water conservation

# The Game Board

County # 3

County # 2

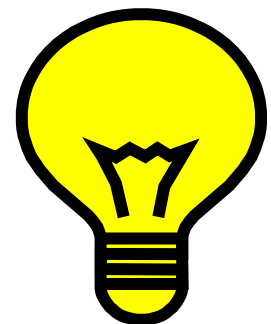

County # 4

County # 1

Save Spot										Vacation
Vacation										Save Spot

## What Will People Learn From The Game ?

- **Water Necessity:** Players will learn the importance of water and that all life and civilization relies on water availability.
- **Water Supplies:** Players will learn that they have limited water supplies and they will also learn about the sources of water in Southern California.

# What Will People Learn From The Game ?

- **Water rights:** The game will provide limited water supplies which will not meet demands for every player. The player who develops water facilities first will get the water rights first, just like the water rights laws that apply in Southern California.
- **Water treatment:** Water treatment plants will help the players reclaim water so they can develop their county.

# What Will People Learn From The Game ?

- **Water Conservation:** The game will teach people how to save water in real life by integrating tips and information in the special locations such as [www.Bewaterwise.com](http://www.Bewaterwise.com) 
- The game will teach players about water and how water is related to our society. The game will help people realize how important water is to civilization.

# THANK YOU!!!
